		COMPANY POLICY ENERGY EFFICIENCY MANAGEMENT POLICY	Revision: 0
<small>Document may not be disclosed to any third party without the prior approval of the management.</small>			

The Company “Elbana di Navigazione” believes that although shipping is by far the most fuel-efficient mode of transport, nevertheless additional action has to be taken to further improve the energy efficiency of ship related operations. The increased energy efficiency will eventually result in increased environmental protection by reducing air emissions.

Energy efficiency is controlled primarily through well-planned and properly managed ship operations and needs the personal commitment of everyone involved in the above tasks. To be successful, energy efficiency and conservation must become part of the day to day operation and living onboard.

In our efforts to enhance the energy efficiency of the shipboard operations, the Company is committed to:

- Establishing and maintaining a Ship Specific Energy Efficiency Management Plan (SEEMP) which should be regularly reviewed by all concerned departments and approved by the management of the Company. This Plan, which applies to all fleet vessels, provides standard procedures and practices on best energy management under the various operational modes of the vessel.
- A set of time-specific, measurable - whenever practicable and attainable targets should be established and maintained, which should relate to a combination of design optimization, in-service performance monitoring and best-practice operational management processes.
- Promoting energy efficiency awareness through training to the shore and sea-going personnel and implementing energy related Campaigns and other personnel incentive / motivating programs.
- Monitoring and complying with all applicable legal requirements related to ship energy management.

Managing Director

Fabrizio Freschi
